
'TURTLES' & 'LOW LEVEL BRACKETS'

M-R Type T.1/T.2 M-R Type LB.1/LB.2

'TURTLES' M-R Type T.1 and T.2

Turtles are used for mounting lampheads on spot rails or the floor.

The M-R Turtles T.1 and T.2 consist of single-piece gun-metal castings in the form of a letter 'T' complete with socket and clamp screw to take the lamphead yoke spuds.

Securing screw holes are provided in all three arms.

The M-R Type T.1 has a sloping head with a $\frac{5}{8}$ inch diameter socket.

The M-R Type T.2 has a straight head with a $1\frac{1}{8}$ inch diameter socket.

'LOW LEVEL BRACKETS' M-R Type LB.1 and LB.2

Low Level Brackets, made from aluminium alloy castings, clamp onto central stand member enabling lampheads to be mounted at heights intermediate between floor and minimum stand height.

Formed basically of a hinged, two-piece jaw, with studding and M-R locking knobs, the low level brackets offer a non-slip grip on an M-R stand.

Two types of low level bracket are available.

The M-R Type LB.1 is designed to fit the M-R Type S.500 Stand and has a $\frac{5}{8}$ inch diameter socket.

The M-R Type LB.2 fits the M-R Type S.2000, S.5000 or S.10,000 Stands and has a $1\frac{1}{8}$ inch diameter socket.
